Founded in 1948 by former NFL Chicago Bear and College Football Hall of Fame inductee Gust C. Zarnas, G.C. Zarnas & Company Inc. is a highly experienced paint and special coatings application contractor. We specialize in high-quality, cost-competitive solutions to protect and maintain our clients' industrial and commercial structures with a full range of environmentally safe, corrosion-resistant and high-performance products.

G.C. Zarnas was awarded its first contract in 1948 from the second largest producer of steel in the United States and one of the largest shipbuilding companies in the world. For nearly two decades, G.C. Zarnas provided structural steel, high-temperature and architectural coatings to all of the steel mill's domestic operations.

Today, G.C. Zarnas is recognized as one of the top applicators in the country.

We minimize unscheduled maintenance, which promotes efficient operation and profitability for a number of industries that require maintenance programs as well as applications to new construction projects of up to \$10 million per coatings/paint package.

We are privately owned and third-generation operated with offices strategically located throughout the Northeast, Gulf Coast, Mid West, and South East, so we may easily support our nationwide clientele and their multi-location facilities.

G.C. Zarnas Highlights:

- National storage tank contracts from worldwide suppliers of natural gases and equipment
- Maintenance programs for global energy companies and refineries
- Hygiene-sensitive applications for pharmaceutical, food and beverage industries
- High-temperature applications for steel industry
- Special coating applications including fireproofing and waterproofing
- Shop coating applications to complement field painting activities
- Consistently low Experience Modification Rate and Occupational Safety & Health Administration incident rate
- Specialize in emergency lead abatement

Partnering Benefits

When you partner with G.C. Zarnas, you benefit from over 100 combined years of experience, value, unsurpassed customer service, extremely safe personnel and working conditions, and just as important — **highly knowledgeable contractors and craftspeople who help you achieve your goal to make quality coating decisions that protect and maintain your investments.**

Feature Benefits:

- Optimal pricing and packages
- Easily accessible management
- Environmentally safe practices
- Expert and safe craftspeople
- High-performance application methods and products
- Coating specifications, applications and complex insurance and bonding issues knowledge
- Maintenance programs to promote efficient Plant Operation
- Multi-faceted services
- On-time project completion
- Own equipment
- Privately held and operated business
- Serves national organizations with multiple facilities
- Quickly recruits and organizes craftspeople during emergencies and unscheduled shutdowns

Our Commitment to Safety, Quality and Environmental Protection

The Zarnas corporate safety and health program and our corporate deleading and environmental program recognize all applicable OSHA and other appropriate government regulations. Our programs require all employees to participate in initial and ongoing hands-on training conducted by our highly qualified staff and by manufacturers we partner with to achieve excellent safety performance.

Our comprehensive quality control and quality assurance programs also ensure our projects conform to high standards.

Our low Experience Modification Rate and Occupational Safety and Health Administration (OSHA) incident rate are a direct result of our ongoing commitment to safety and environmental protection.

Certifications

G.C. Zarnas is QP1 and QP2 certified by The Society for Protective Coatings. Through our certifications, we prevent the premature corrosion and extend the life of complex structures through the use of high-performance coatings and fireproofing materials, application techniques and quality assurance.

We employ National Association of Corrosion Engineers (NACE) trained staff to inspect your plant and equipment. NACE is recognized around the world as the premier authority for corrosion control solutions in every industry and area of corrosion prevention and control.

We are a member of the Painting and Decorating Contractors of America, an organization that continues to enhance the advancement of the coating application industry.

Industrial and Commercial Painting Solutions

Industrial Coatings Division

G.C. Zarnas has over 100 years of combined experience in offering technologically advanced protective coating solutions and cost-competitive maintenance programs to new construction packages and heavy-duty industrial projects.

We are extremely knowledgeable about high-performance protective coatings, and partner with nationwide paint and coating suppliers who provide reliable technical service and on-time delivery of products.

Our contractors also have master knowledge to read and interpret engineering drawings, which are essential to the success of any project.

Industries Served:

- Chemical
- Food and beverage
- Marine
- Petrochemical
- Pharmaceutical
- Power generation
- Pulp and paper
- Steel
- Wastewater
- Water treatment

Commercial Coatings Division

By combining old world craftsmanship with the latest technology, we satisfy thousands of commercial customers with quality, value and service.

Our commercial coatings application division provides surface preparation, architectural, decorative and texture coatings, wall coverings, tile installations to existing and new construction projects. We also provide historical restoration services.

Markets Served:

- Acute care and healthcare
- Amusement and entertainment
- Business and industry
- Higher education
- Hospitality
- Government
- Manufacturing
- Recreation and leisure
- Senior living

Mission Statement

Our mission is to provide the best application solutions to industrial, commercial and special coatings projects. We accomplish this mission by providing highly trained employees who focus on superior quality, an unsurpassed level of customer service, and a safe working environment, all while meeting project schedule requirements for a value-driven experience.

Applications and Services

Industrial Cleaning

We perform several types of high-velocity industrial cleaning methods that remove paint, stain and rust. We own and operate several types of industrial cleaning equipment that enable us to perform various surface preparations to create an incredibly smooth surface upon which to lay a new surface of paints or special coatings.

Services include:

- Abrasive blast cleaning
- Metal and concrete repair
- Power tool cleaning
- Sandblasting
- Soda blast cleaning
- Sponge blast cleaning
- Vacuum blast cleaning
- Waterblasting

High-Temperature Coating Applications

We apply high-temperature and heat-resistant coatings to hot metal surfaces, which helps to protect these surfaces and extend the operations of facilities. We routinely perform these applications at several facilities nationwide during scheduled shutdowns to minimize unscheduled maintenance and cost.

Special Coatings and Architectural Applications

Our expertise in applying durable, safe and effective special coatings in a variety of sensitive areas is what distinguishes us in the industry. Our people are highly trained and skilled to perform several types of spray and trowel applied systems. We also apply a variety of architectural coating applications to beautify and protect your commercial structures.

Services include:

- Decorative and texture coating applications
- Fabric-reinforced systems
- Fireproofing
- Heat exchange and circulating systems
- Hygiene systems
- Plural component systems
- Roof and floor systems
- Shop coatings
- Tile installations
- Wall coverings
- Waterproofing

Hazardous Abatement Services

As certified lead abatement contractors, we specialize in the removal of hazardous materials from buildings, facilities and the environment to prevent further contamination of natural resources and to promote public health and safety.

Linings

Our experience with various corrosion-resistant systems enables us to recommend optimum solutions for the interior and exterior of structural steel, process vessels, storage tanks and concrete structures.

We have expertise with the following structures:

- Concrete structures/floors/water basins
- Linings for water
- Secondary containment
- Storage tanks
- Tank interior/exterior
- Vessel interior/exterior
