TLC Technologies

illuminating

“TLC enhanced our budget and forecasting data by designing an application that integrates our multiple lines of U.S. business activity with our corporate reporting.”

Solutions Consultants

We focus on the design, rapid development and delivery of custom databases that report, monitor and quantify information – so you can concentrate on financial performance within the organization.

your

business

plan

“TLC helped us research and test the software products that met our specific needs to deliver business intelligence with a front-end tool that can be utilized by our entire corporate team.”

Software Reseller

We are certified to sell and we specialize in several Business Intelligence software solutions. This allows your BI information to become massively scalable and easily accessible by the appropriate front-end tool to best meet your company's needs.

“TLC reduced our calculation times by 45 percent when its staff redefined the current data flow and revised calculation scripts for our Essbase cubes.”

Staffing Augmentation

We can provide an individual or team of trained and certified professionals with software expertise to manage complex projects for global clients.

“TLC continues to further develop our company's Business Intelligence Systems, provide project-specific assistance, and ongoing training and support.”
